# A CAPITAL IMPROVEMENT PROJECT

EAA Chapter 613 is in the process of building an educational center for the promotion of aviation in the Northern Vermont area.

This project will provide space for classrooms, kitchen, lavatory facilities, workshop and hangar space to guarantee a hospitable working environment.

Presently all leases and permits have been acquired and the base has been installed for the building.

We have needs of around \$80,000 to complete a project of this magnitude. We are looking for donations of material including but not limited to cement, rough lumber, electrical and plumbing materials. We are a registered 501c3 non-profit organization and all donations are tax deductible. Be sure to check with your accountant.

In the past, our area has participated in Vermont Aviation Advisory Council's Aviation Career Education "ACE" camp. This camp sponsored by the Vermont Aviation Advisory Council, VT Agency of Transportation, Aero Club of New England and the Federal Aviation Administration allows Boys and Girls ages 10-14 with an interest in aviation to learn more about aviation and the dynamics of this ever changing and growing field.

We have flown thousands of Young Eagles through our national EAA organization program. This program started with the goal of flying over 1 million children for free by the 200<sup>th</sup> anniversary of powered flight in December

of 2003. The EAA made this goal and we have continued the program and nationally we have flown over 1,300,000 kids! In our chapter alone, we have flown over 3000 and several achieved a career in aviation!

This project will provide appropriate classroom and hangar space to provide children a base for the camp and the Young Eagles project we participate. The hangar will be used for maintaining our aircraft and completing projects for our membership.
